

Interpump Quick Response Pump Program

Faced with a critical pump breakdown?

In many commercial, industrial or municipal facilities, pumps are an integral part of a building's infrastructure or production process. When a failure occurs, fast and dependable pump replacement is required.

Interpump's Quick Response Pump Program is the solution.

For centrifugal pump replacements, we stock a wide variety of Xylem Goulds pump ends, seals, impellers and motors. We have the flexibility to custom assemble and test the pump required to meet your specific application or specification in size ranges from 5-20HP.

APPLICATIONS:

- Booster service
- Spraying systems
- Irrigation
- Water circulation
- Liquid transfer
- General purpose pumping

For more information on commercial and industrial pumps, please visit our website at: interpump.ca/markets/commercial-industrial
