

Interpump SERVICES

Interpump offers after-sale service solutions within the Province of Ontario, including startup, training, commissioning, and ongoing maintenance. Interpump's well-equipped and qualified technicians work with onsite personnel to ensure our clients' complete satisfaction.

Startups:

On-site or virtual startup assistance is available for pumps, VFDs and systems.

Vibration Testing:

We provide services ranging from a basic vibration check to advanced vibration analysis and balancing using sophisticated vibration analysis equipment.

Troubleshooting:

On-site or virtual troubleshooting including pump and system analysis is also available. We pride ourselves in providing solutions for pump and system problems and assisting customers with the integration of equipment into existing systems.

Training:

On-site or virtual training can be arranged.

Service Rates

Contact us for our current rates.

*Weekday Regular Rate by hour, full day and half day are based on work performed during a normal business day, 8 AM-to 5 PM, Monday-Friday. Work performed during a regular business day *outside* of these hours will be billed at 1.5 times the hourly rate. Work performed during weekends or statutory holidays, or travel required during those days will be billed at 2 times the hourly rate. Interpump reserves the right to adjust rates. "On-call" or "standby" fee may be charged if required.
