

Interpump

Interpump is an Ontario-based pumps, and water systems equipment distributor. With a team of technical specialists, Interpump provides solutions for residential, commercial, industrial, and municipal applications.

Pump Selection: Whether it's a potable, wastewater, or booster pump application, Interpump's team of application engineers can size the right pump for the job.

Pump Builds: Wide selection of Xylem Goulds and MP Pump products, including pump ends, seals, impellers and motors, we can configure the centrifugal pump you need for your specific situation ranging from 1/2 –20 HP.

Pump Packages: Wide range of booster pump products featuring the innovative DAB E.syline and pump products from Goulds including the e-SV multistage.

Engineering: Provide assistance in writing and reviewing engineering specifications for tender packages. This helps minimize the number of changes required during the tendering process.

Startup & Commissioning: Offer on-site or virtual expert startup and commissioning services pumps, VFDs and systems.

System Flow and Vibration Analysis: Provide services ranging from a basic vibration check to advanced vibration analysis and balancing.
